BIRDS OF THE NEBRASKA PINE RIDGE

Nebraska National Forest
(Pine Ridge Ranger District)
and
Oglala National
Grassland

FIELD CHECKLIST

Nebraska's Pine Ridge Area is rich in birdlife. This checklist includes 235 bird species found in the 51,000-acre Nebraska National Forest and 94,000-acre Oglala National Grassland, as well as, Fort Robinson and Chadron State Parks and adjacent private lands in Dawes County and northern Sioux County in northwest Nebraska.

This part of Nebraska is noted for the fragrant pine forests, the majestic buttes of the Pine Ridge escarpment, and badlands formations, as well as extensive native grasslands, the White River and Whitney Lake. Land uses include a variety of outdoor and wildlife related recreation as well as livestock grazing and both irrigated and dryland farming. Also, some logging occurs on both public and private land.

This revision of the Pine Ridge Area bird checklist has been compiled by Richard A. Peterson.

Observers are encouraged to report observations of species listed as rare or uncertain occurrence status, and species not listed to:

Pine Ridge Ranger District Office near Chadron
(Phone 308/432-4475).

CHECKLIST SYMBOLS

NEOTROPICAL MIGRANTS:

This term describes species that breed in North America and spend their nonbreeding period primarily south of the United States. It is limited to species that use terrestrial habitats. These species are designated with an (N) after the species name. The populations of some of these species are declining, and studies are underway to determine the causes.

RELATIVE ABUNDANCE:

Most species listed in this checklist occur regularly within the area described above, however, some species are designated as rare (*) because they occur irregularly, and/or in very low numbers. A few species are thought to be regular, but are listed as uncertain (?) because of few reports and/or the difficulty of identification.

19 JUL 1993

MANAGEMENT DIVISIONS

Species that primarily occur in the Nebraska National Forest = (p)

Species that primarily occur in the Oglala National Grassland = (o)

SEASONAL OCCURRENCE

M = Migrant (primarily spring and fall, or transient anytime)

W = Winter visitor (primarily Dec., Jan., Feb. occurrence)

S = Summer resident (indicates nesting, June and July occurrence)

R = Permanent resident (found year round)

MAJOR HABITATS USED

TERRESTRIAL HABITATS

1. **Trees:** Ponderosa pine on the Pine Ridge escarpment and cottonwood, peachleaf willow, green ash, boxelder, elm, hackberry, and some juniper in wooded draws, riparian areas and shelterbelts.
2. **Upland Shrubs:** Snowberry, skunkbush sumac, and a very limited area of big sagebrush near Sugarloaf Butte.
3. **Other Shrubs:** Chokecherry, American plum, buffaloberry, and willow, found primarily in wooded draws, riparian areas, and shelterbelts.
4. **Short Grass:** Primarily buffalograss and blue gramma on Oglala National Grassland.
5. **Mid and Tall Grass:** Green needlegrass, western wheatgrass, little bluestem, bluegrass, smooth brome, and prairie sandreed.

WETLAND HABITATS

6. **Open Water:** Occurs in streams, stockponds and reservoirs (mostly ice covered mid-November to mid-March).
7. **Marsh:** Primarily sedges, rush, cattails and bulrushes around reservoirs.
8. **Shorelines:** Bare ground around reservoirs, and along streams.

SPECIAL HABITATS

9. **Prairie Dog Colonies:** Very limited on Oglala National Grassland.
10. Cliffs and steep banks, buttes, badlands, cut-banks and gullies.
11. Cropland and weed patches: private land and road ditches.
12. Buildings, bridges and various structures, mostly on private land.
13. Burned areas with standing dead trees.
14. **Woodland/Forest Edge:** Trees with adjacent grasslands.
